SUMMARY

Software Engineer with over 6 years of experience in backend development, system architecture, and distributed systems. Proven track record in designing, building, and maintaining large-scale, high-performance platforms, focusing on scalability, reliability, and cost efficiency. Experienced working with both small and large teams, contributing as an individual engineer and technical leader. Strong expertise in C#, .NET, databases, and messaging systems, with a continuous learning mindset and passion for building efficient, resilient services.

TECHNICAL SKILLS

Proficient: C#, .NET, SQL Server, MongoDB, Azure Service Bus, Redis, Git, Agile Methodologies

Intermediate: JavaScript, Node.js, Leadership, C++, System Design, Software Architecture, Azure Cloud Services, Postman

Beginner: AWS, GraphQL, Go, Python

PROFESSIONAL EXPERIENCE

Software Engineer

Celcoin, Barueri, BR – Remote

Aug 2020 - Present

Core Responsibilities:

- Contributed to the design and development of one of Brazil's first Open Banking platforms, supporting the company's growth into a leading fintech.
- Improved system performance by reducing average response time by 87.5% (from 8 seconds to under 1 second), significantly enhancing user experience and operational efficiency.
- Designed and implemented highly scalable services capable of handling over 400,000 requests per minute, ensuring reliability and performance under heavy workloads.
- Led the design and development of a new product that attracted a substantial number of new clients and supported business expansion.

Key Technologies and Tools: C#, .NET, SQL Server, MongoDB, Azure Service Bus, Redis, Agile Practices

Private Programming Tutor

Self Employed, São Paulo, BR – Remote

Mar 2016 - Aug 2018

Core Responsibilities:

- Designed and delivered personalized lessons based on each student's skill level, goals, and learning style, ensuring strong understanding of core programming concepts.
- Taught fundamental topics such as data structures, abstraction, debugging techniques, and system design principles.
- Mentored students through hands-on, project-based learning, focusing on service integration and building scalable systems.
- Supported over 10 students in successfully passing university courses and preparing for professional software development environments.

Key Technologies and Tools: Python, C#, .NET

EDUCATION

Bachelor's Degree in Computer Engineering

Universidade Virtual do Estado de São Paulo (UNIVESP), São Paulo, Brazil

Mar 2018 - Feb 2024

- **Relevant coursework:** Internet of Things (IoT), Software Engineering
- **Bachelor Thesis:** Event-Oriented Architecture for Communication Between Time- and Volume-Sensitive Microservices
